Google Maps Transit:

<http://maps.google.com/landing/transit/index.html>

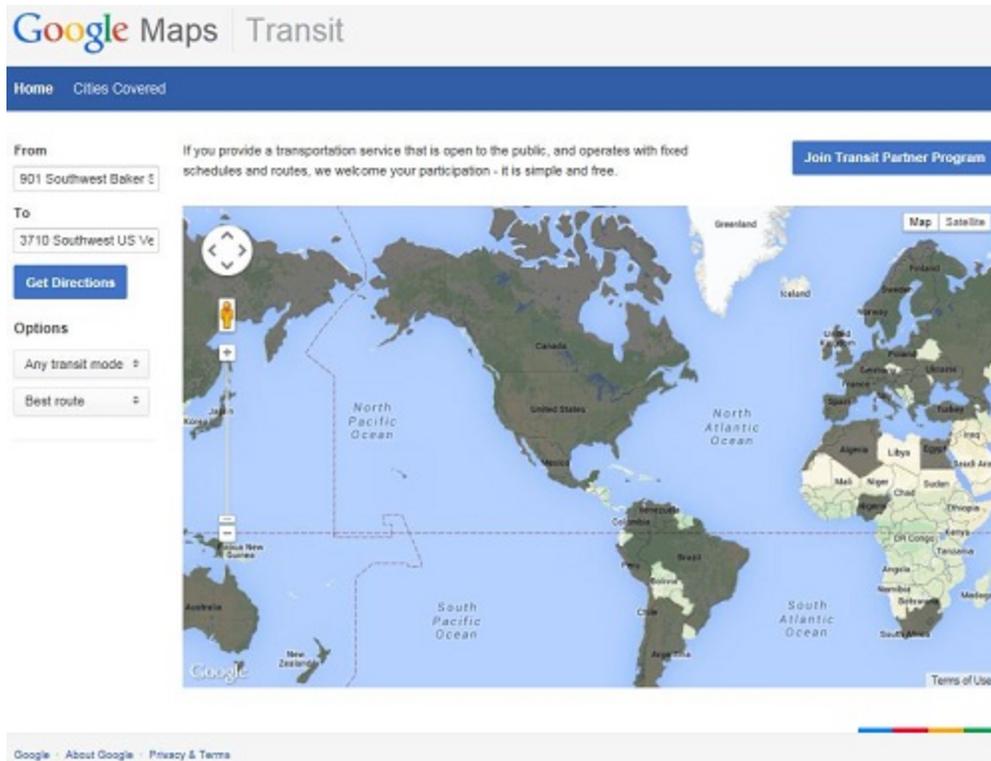

Google Maps Transit is a tool used to assist in locating transportation options.

The following will assist in navigating the Google Transit interface:

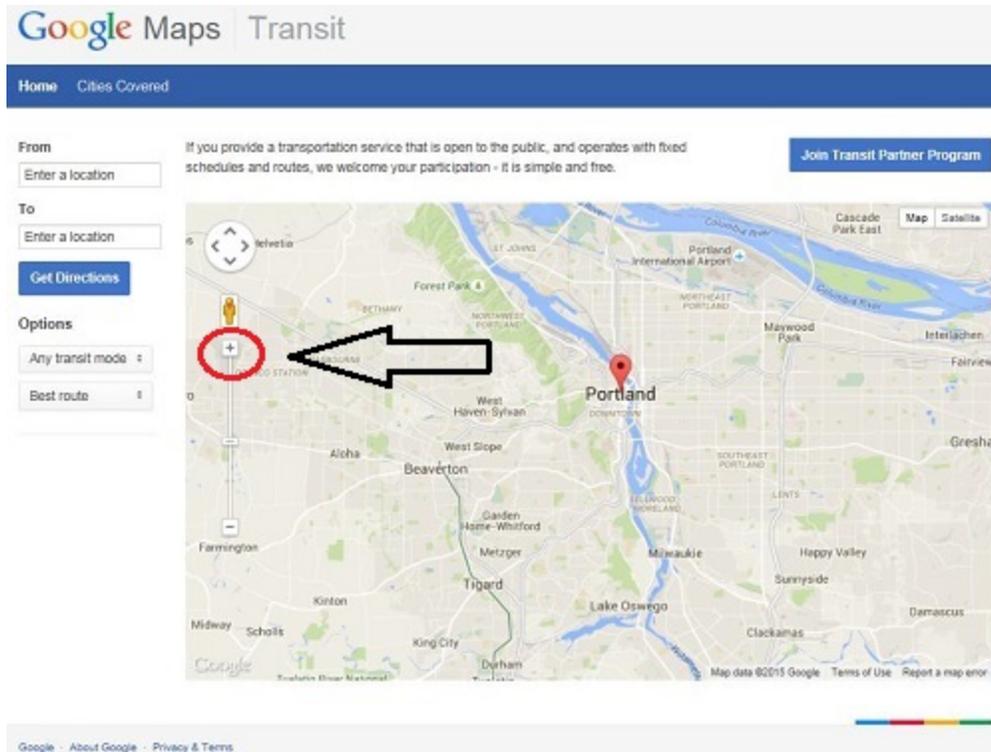

1. Select the Google Maps Transit link
2. Once the initial page loads
 - a. Move the mouse cursor over the map to the US map
 - b. Left click and hold
 - c. While holding the left mouse button down, drag the USA map to the center of the screen

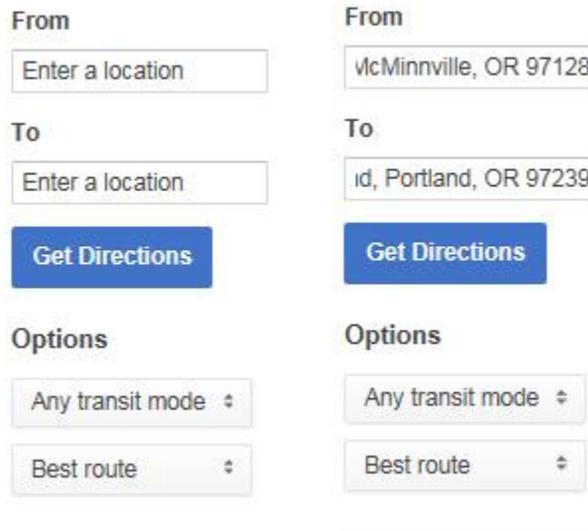

3. Once centered, the screen should look like the following image

4. Zoom into the desired area
 - a. Move the mouse cursor over the “+” symbol and click the left button to zoom in to the desired map detail
 - b. Refer to step #2 to keep the map centered on the desired area

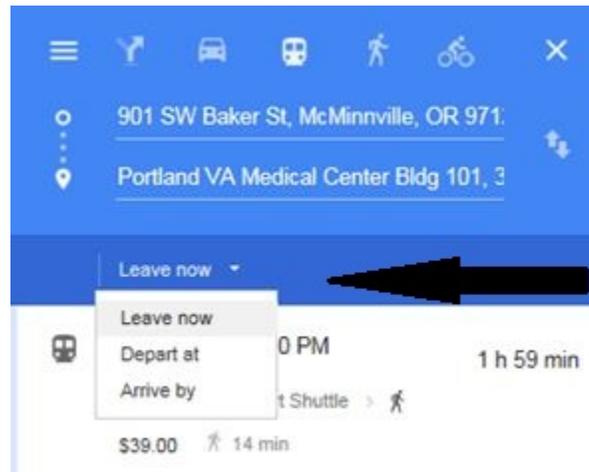

5. Enter the trip details
 - a. Enter the starting location and destination in the “From” and “To” dialogs
 - b. Select the “Get Directions” button

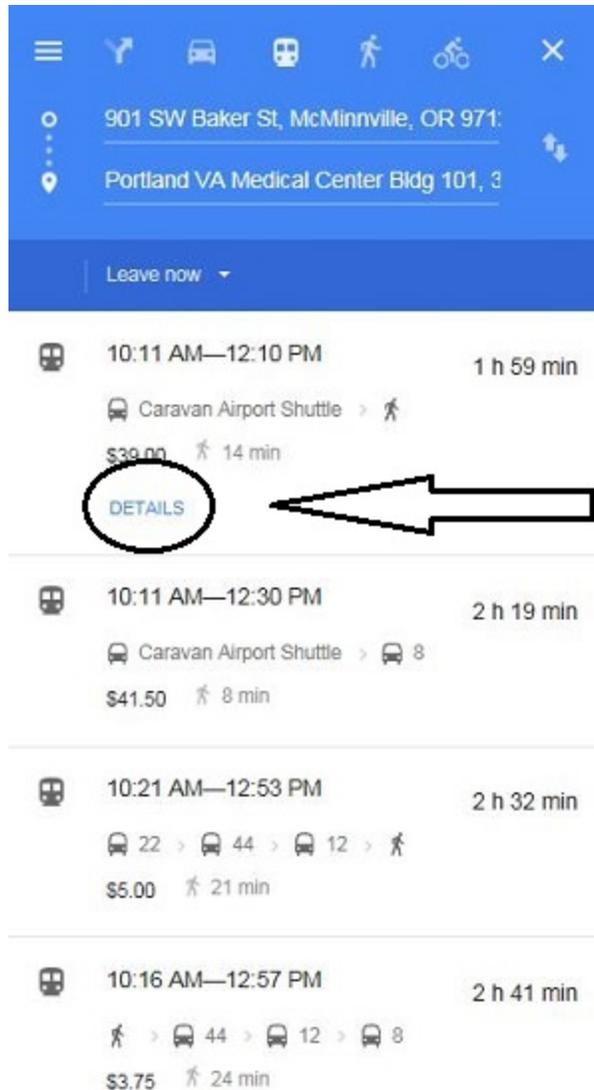

6. The trip planner will display the available options for the trip
7. Setting the desired trip time
 - a. Move the mouse cursor over the “Leave now” label and click the left button
 - b. Select from the following:

- i. “Leave Now” – Displays the transportation options currently available
- ii. “Depart by” – Displays the transportation options that will be available when you are ready to leave
- iii. “Arrive by” - Displays the transportation options that will get you to your destination by a desired arrival time

8. The trip planner will display the following, based on your “To”, “From” and timing selections:
 - a. Transportation providers
 - b. Departure timing
 - c. Arrival timing
 - d. Trip duration
 - e. Walking time
 - f. Cost (if available)
9. View trip details
 - a. Move the mouse cursor over each of the trip options/providers to reveal a “DETAILS” link
 - b. Click the Left mouse button on the “DETAILS” for the trip option/provider you wish to further explore

10. The “DETAILS” link will display the following:

- a. Trip timing
- b. Trip start location
- c. Transportation terminal location and travel distance
- d. Transportation provider/route
- e. Route/provider transitions and locations
- f. Distance/travel time to final destination from last stop
- g. Trip destination
- h. Provider contact information
- i. Detailed map of the route
