

Research Study

Participants Needed

Volunteers are needed for a research study looking at how a study drug affects brain function in people who are dependent on methamphetamine.

Study visits will include interviews, surveys, blood draws, urine drug screens, and MRI and/or PET brain scans that will take place over 2 visits.

You may be asked to continue in the study to take an investigational study drug for 6 weeks. This would involve up to 5 more visits to the Portland VA.

Participation is voluntary and confidential. Participants are paid **\$200 in gift cards** over 2 study visits or **\$540** for completing the study drug portion (7 total visits).

For more information, contact the Hoffman Lab at **503-721-7964**

To participate, you should:

- be between 18 and 55 years old
 - have no foreign metal objects in your body (except metal from medical procedures)
 - have not participated in an investigational drug study in the past three months
 - have no history of a bleeding disorder
 - not currently taking anticoagulants
 - have a recent history of methamphetamine dependence
- OR
- have no history of drug or alcohol dependence

You may or may not personally benefit from being in this study. However, by serving as a subject, you may help us learn how to benefit patients in the future. All imaging procedures are done for research purposes only.

This study is being conducted at the VA Portland Health Care System, 3710 SW US Veterans Hospital Road, Portland, OR 97239. You do NOT need to be a veteran to participate.
